

Effective Date: September 8, 1991

**STATE OF WISCONSIN
CLASSIFICATION SPECIFICATION**

ARCHEOLOGY LAB TECHNICIAN LTE

Under close supervision, these limited term positions are responsible for washing, cataloging, and conserving the artifacts that are collected by the field crews. These positions also may be responsible for sorting artifacts for analysis; specialized archaeological sample processing; compiling tables of artifact data; composing catalog cards; data and text entry into a work processor; map drafting and artifact illustration; and equipment maintenance. The nature of limited term appointment indicates the work is temporary or the number of hours are limited on a daily, weekly, or annual basis. Positions are allocated to this LTE classification only when the tasks involved are NOT best described in another classification.
